EDUCATION

The Johns Hopkins University

M.S. in Computer Science

Baltimore, MD

2026-Present

The Johns Hopkins University

B.S. in Computer Science, B.S. in Applied Mathematics and Statistics

Baltimore, MD

2022-2026

WORK EXPERIENCE

• Capital One Financial Corporation

Software Engineering Intern

Richmond, VA

June 2025 - August 2025

- Architected and led end-to-end migration of BIN microservice workflows, engineering scalable automation pipelines that reduced onboarding and deployment time by 80% while enforcing full auditability and compliance.
- Engineered an automated test generation framework that accelerated release cycles by 50% and drove high-velocity virtual card deployments, directly improving business customer time-to-value.
- Designed and shipped a full-stack internal audit platform in React with real-time request tracking for BIN/VCN lifecycle management, reducing processing time by 30%; owned CI/CD infrastructure via Jenkins and Docker, improving deployment reliability and reducing production incidents across distributed microservices.

• The Johns Hopkins University

Data Analyst Intern

Baltimore, MD

March 2024 - August 2024

- Integrated data from CRM systems, website analytics, and social media platforms to create a comprehensive view of consumer behavior and to increase campaign engagements for startups by 40%.
- Built a logistic regression model for customer churn prediction using net promoter scores to identify high churn risk customers and reduce customer churn by 12%.

• Johns Hopkins University Office of Undergraduate Admissions

Admissions Supervisor and Coordinator

Baltimore, MD

September 2022 - May 2026

- Trained and managed all tour guides to increase positive tour reviews by 60% and equipped new hires with tools for answering tough questions.

• Starbucks Coffee Company

Barista

Baltimore, MD

July 2021 - May 2026

- Worked in a fast-paced environment where accuracy and precision were as critical as customer support and connection, helping create the "Third Place" and contributing to a 30 point increase in Customer Connection Scores.

APPLICABLE SKILLS AND TECHNOLOGIES

- **Programming Languages:** Python, Java, C++, C, JavaScript/TypeScript, Go, OCaml, Swift, SQL, HTML/CSS
- **Technologies and Tools:** React, Node.js, Express.js, Git, Linux, Jenkins, Jira, LaTeX, S3, Docker/Colima, Lambda, EC2, Fargate, DynamoDB

PERSONAL PROJECTS

- **BeatTheMeet:** Production scheduling application integrating Google Calendar OAuth 2.0 and a custom iCalendar parser with DST-aware, cross-browser timezone conversion across 600+ IANA timezones, backed by a PostgreSQL database with real-time websocket availability synchronization and serverless infrastructure.
- **Eclectics Dance App:** Full-stack application for a dance organization built with React Native, Node.js, and Discord.js, featuring event management and integration with a Discord server.
- **N-Grams Simulation:** Implementation of N-Gram text models to evaluate the likelihood of seeing certain sequences and predict next words given a sequence.
