EDUCATION

The Johns Hopkins University

M.S. in Computer Science

Baltimore, MD

2026-Present

The Johns Hopkins University

B.S. in Computer Science, B.S. in Applied Mathematics and Statistics

Baltimore, MD

2022-2026

APPLIED EXPERIENCE

• Capital One Financial Corporation

Software Engineering Intern

Richmond, VA

June 2025 - August 2025

- Led the development and migration of BIN microservice workflows, cutting onboarding and deployment time by 80% while maintaining auditability.
- Developed internal automated test creation that cut release cycles by 50% and accelerated virtual card deployments to businesses.
- Managed CI/CD pipelines using Jenkins and Docker to ensure smooth deployment of microservices, reducing production errors and enhancing system reliability.
- Designed an internal audit platform using React and internal tools to track and manage BIN and VCN creation requests, improving transparency and reducing processing time by 30%.

• The Johns Hopkins University

Data Analyst Intern

Baltimore, MD

March 2024 - August 2024

- Integrated data from CRM systems, website analytics, and social media platforms to create a comprehensive view of consumer behavior and to increase campaign engagements for startups by 40%.
- Built a logistic regression model for customer churn prediction using net promoter scores to identify high churn risk customers and reduce customer churn by 12%.

APPLICABLE SKILLS AND TECHNOLOGIES

- **Programming Languages:** Python, Java, C++, C, JavaScript/TypeScript, Go, OCaml, Swift, SQL, HTML/CSS
- **Technologies and Tools:** React, Node.js, Express.js, Git, Linux, Jenkins, Jira, LaTeX, S3, Docker/Colima, Lambda, EC2, Fargate, DynamoDB

PERSONAL PROJECTS

- **Eclectics Dance Website:** Full-stack website for a student dance organization built with React, Node.js, and Express.js, featuring event management, member registration, and multimedia galleries.
- **Apple iMessage PSI Protocol:** Implementation of Apple's private set intersection protocol utilizing NeuralHash technology.
- **N-Grams Simulation:** Implementation of N-Gram text models to evaluate the likelihood of seeing certain sequences and predict next words given a sequence.

OTHER WORK EXPERIENCE

• Johns Hopkins University Office of Undergraduate Admissions

Admissions Supervisor and Coordinator

Baltimore, MD

January 2023 - Present

- Trained and managed all tour guides to increase positive tour reviews by 60% and equipped new hires with tools for answering tough questions.

• Starbucks Coffee Company

Barista

Baltimore, MD

July 2023 - Present

- Worked in a fast-paced environment where accuracy and precision were as critical as customer support and connection, helping create the "Third Place" and contributing to a 30 point increase in Customer Connection Scores.
